

## Factory Audits

This audit is separate from a Supplier Code of Conduct audit for labor practices. In Factory Quality Audits InspectChina looks at the supplier compliance and conformance to Good Manufacturing Practices (GMP). In the GMP audit our auditors evaluate the manufacturing capabilities of your chosen supplier. We evaluate your supplier's production quality control system and manufacturing quality assurance processes. The more complex and difficult your product that must be made the greater the necessity to use our auditors for process control system audits, quality defects management and corrective action plan implementation of your supplier. In supplier quality audit our trained manufacturing auditors assessed your China supplier capabilities for product improvement, quick rework process and customer information feedback processes. Our Factory Quality Audit System is geared towards making your suppliers in your supply chain collaborative reliable suppliers and upgrading from a low tier to a tier 1 supplier. With Inspectchina factory quality audits you can reduce the sudden surprises from selecting a bad supplier to selecting a good supplier and minimizing losses through poor quality management in China.

### What Suppliers in China Do we Audit??

InspectChina focuses its supplier quality audits on suppliers manufacturing consumer electronics, electromechanical, mechanical, telephony ,hardware, plastic, metal components, automotive components and accessories. Most of these products are liable for safety recalls and liability claims when sold without strong quality control. With InspectChina supplier quality audits you can add independent objective assessment of your suppliers in your supply chain.
